

**Delivering a breakthrough in sustainable plant health... naturally**

**CropBioLife is a foliar spray for crops made from all natural ingredients. It delivers secondary metabolites directly into the plant.**

**CropBioLife is not just a simple nutrient or plant food; it contains flavonoid compounds already utilised as natural metabolic triggers to plant health and essential functions.**

**FOR USE ON:**

**To purchase CropBioLife, please contact your local distributor:**

CropBioLife is created via a patented process that turns one of nature's most concentrated sources of secondary plant chemical called flavonoids (sources from bitter orange extract\*) into a stable, highly usable form, with an added blend of mild, organic food grade ingredients.

\*CropBioLife does not contain citric acid

## The benefits of promoting improved plant health:

- 100% natural
- Better quality crop with improved yield
- Helps improve disease resistance
- May help reduce reliance on chemical sprays
- Better investment – makes nutrient programs more effective by helping to improve nutrient availability
- Root stimulation and nutrient absorption
- Flowering and reproduction

*The image on the right shows baby spinach that was sprayed with CropBioLife and the image on the left shows the control plot*

- Made from botanical non-toxic food grade ingredients
- Directly addresses some of the major challenges that growers are faced with
- Contains one of nature's most highly available forms of plant flavonoids
- Safe to spray at harvest
- A source of secondary metabolites
- Neutral pH
- Independently declared as 'safe to use as a food processing agent'
- Contains 45% organic carbon
